Mini Project – Proposal Seminar

On

“Student Placement Preparation Portal Using Django”

Presented By,

Group No : 03

Ayesha S (4AI23CD005)

Ayesha Siddiqa (4AI23CD006)

Bhoomika K (4AI23CD008)

Kaivalya Sudhir (4AI23CD021)

Under the Guidance of

Mrs. Ramya C K

Asst., Professor

Dept of Data Science

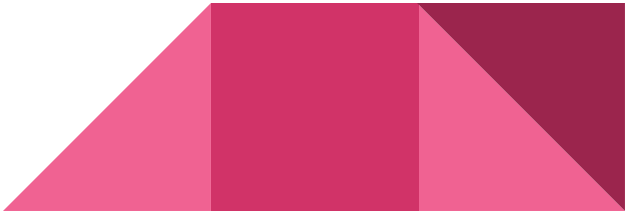

AIT, Chikkamagaluru

AGENDA

- **About the Project**
- **Motivation**
- **Existing System**
- **Problem Statement**
- **Proposed System**
- **Tools and Technology**
- **Expected Outcomes**

ABOUT THE PROJECT

- The **Student Placement Preparation Portal** is a web-based application designed to assist students in preparing for campus placements by providing a structured and organized platform for managing placement-related activities efficiently.
 - It provides **study materials, alumni feedback, and company updates** in one place.
 - The portal makes preparation easier and connects students with alumni for useful guidance.
- 

MOTIVATION

- Bridging the Preparation Gap
- Enhancing Student Confidence
- Encouraging Peer and Alumni Support
- Reducing Placement Anxiety

EXISTING SYSTEM

Placement information is shared through **WhatsApp**, **emails**, or **telegram**.

WhatsApp :

- Easy real-time messaging and notifications.
- Supports text, voice, video, and file sharing.

Telegram :

- Allows large groups and channels.
- Supports sharing bigger files and documents.

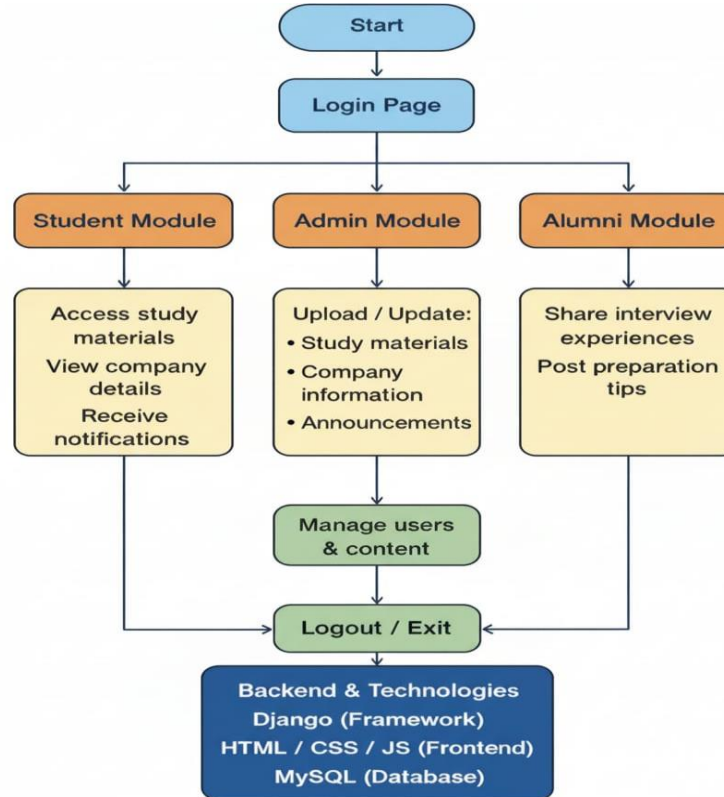

PROBLEM STATEMENT

Students find it hard to get reliable, company-wise placement materials and guidance from alumni. Sharing files and information manually takes a lot of time and is not well organized. So, there is a need for a digital platform that helps students stay updated about company drives and preparation resources.

PROPOSED SYSTEM

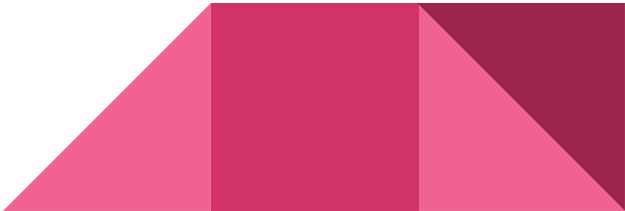

TOOLS AND TECHNOLOGY

- **Frontend:** HTML
- **Backend:** Django (Python)
- **Database:** MySQL
- **Server:** Localhost (XAMPP/VS Code)
- **IDE:** VS Code
- **Version Control:** GitHub

EXPECTED OUTCOMES

- Achieves simplified and organized **placement preparation process**.
 - Ensures improved **communication between students and alumni**.
 - Creates **centralized repository** of company-wise materials and feedback.
 - Provides **notifications and updates** about placement drives.
-
